Other Tools Linux (Basic)

#### **PROJECTS**

### ◆ Personal Portfolio Website (HTML, CSS, JavaScript, GSAP) | Repo | Live

- Designed and developed a personal portfolio website to showcase skills, projects, and contact details.
- Implemented a responsive and interactive UI for an engaging user experience.
- Deployed on Vercel for easy access.

## ◆ To-Do List App (HTML, CSS, JavaScript) | Repo | Live

- Developed a user-friendly task management application with features like add, delete, and mark tasks as completed.
- Implemented local storage to save tasks even after page reloads.

## ◆ Tic Tac Toe (HTML, CSS, JavaScript ) | Repo | Live

- Built a classic Tic Tac Toe game with interactive UI and game logic.
- Implemented winning logic, player turns, and reset functionality.

## ◆ Weather app (HTML, CSS, JavaScript ) | Repo | Live

- Built a real-time weather application that fetches and displays weather data using OpenWeather API.
- Created a clean and interactive UI with temperature, wind speed, and humidity indicators.
- Implemented a search feature allowing users to check the current weather of any location.
